SUMMARY

Finance executive with 10+ years building and owning the finance function end to end at high-growth SaaS and fintech companies. Sole senior finance leader at april, owning FP&A, Accounting, Revenue Operations, and Compliance. I stand up GAAP accounting, forecasting, board reporting, and audit-ready governance from scratch, have supported \$250M+ raised across Series B and C, and build AI agent systems on the finance stack so it scales without adding headcount.

EXPERIENCE

Director of Finance · april 12/2024 – Present · New York, NY

- **First finance hire.** Built the entire function from scratch and remain the sole senior finance leader across FP&A, Accounting, Revenue Operations, and Compliance.
- **Close: 31 days to 5.** Cut month-end close from 31 days to 7 in four months while running a Series B, then to 5 days by year-end 2025.
- **Back-to-back clean audits.** Led april through its first-ever KPMG audit to a clean opinion, then repeated it successfully the following year.
- **Compliance owner.** Ran the SOC 1 audit independently; supported the SOC 2 Type II program, security and data-privacy reviews, vendor risk, and enterprise diligence for regulated financial-institution customers.
- **AI-native finance stack.** Built a growing library of AI agents on the stack — including Invoice Butler, an AI-driven AR collections engine, and a Compliance Agent Ecosystem automating security and vendor-risk questionnaires — and implemented Campfire and Ramp with the team.
- **Board & capital.** Built the first bottoms-up revenue model (ARR, CARR, bookings), now the board's primary forecasting reference, and the forecasting behind april's \$40M Series B; delivers board packages and investor updates independently.
