## CORE STRENGTHS

**AI-native building.** Ships production agent systems — orchestration, guardrails, human-in-the-loop review, run logs.

**0-to-1 ownership.** Built a company function and its automation layer from nothing, twice over.

**High agency.** Finds the problem, scopes it, ships it, and owns the outcome without being handed a spec.

**Cross-functional operator.** Connective tissue across engineering, security, product, GTM, CS, and legal.

**Domain depth.** 10+ years in finance, FP&A, and fintech — knows which problems are worth automating.

**Systems thinking.** Designs the escalation ladder, the failure mode, and the control loop, not just the happy path.

## AI & AUTOMATION

**Agents** Claude & Claude Code, MCP connectors, multi-agent orchestration, scheduled agent runs, eval and run logs

**Build** Python, SQL, Notion API, Slack bots, workflow automation, RAG-style knowledge bases

**Applied** AR collections automation, security questionnaire autofill, evidence pipelines, docs sync

## FINANCE & DATA STACK

**Planning** Drivetrain, Planful, Anaplan, Pigment, Runway

**Systems** Campfire, NetSuite, Ramp, Chargebee, Stripe, Salesforce, HubSpot

**Compliance & BI** Drata, Thoropass, Looker, Tableau

## BY THE NUMBERS

**2 agent systems** running in production today

**320-row** governed compliance answer bank

**152-item** enterprise questionnaire → reviewed draft

**31 → 5 days** month-end close — built, not hired

**\$250M+** raised across Series B and C

## EDUCATION

**B.S. Business Strategy & Public Health**

Brigham Young University, 2014

## LANGUAGES

English (native) · Spanish (native)  
Portuguese (intermediate) · ASL (proficient)

## PROFILE

AI-native operator who builds the systems, not just the plans. I joined april as its first finance hire and built the function from zero — then built a library of production AI agents on top of it that now run AR collections and enterprise security diligence end to end. I work where product, engineering, GTM, and finance overlap: I find the problem, scope it, ship the system, and own the outcome without waiting for a spec. Ten-plus years in finance and fintech is the domain depth behind it — it tells me which problems are worth automating.

## AI SYSTEMS I'VE BUILT

### Invoice Butler — *AI-driven AR collections engine*

Designed and deployed a ten-stage collections system that moves overdue accounts without manual chasing: tiered automated email dunning in two customer voices, a Slack-bot gate that posts account dossiers and hands ownership to Customer Success, an automatic Growth escalation ladder applying staged commercial pressure, and a hard auto-escalation backstop. I built the tag-driven workflow architecture, the escalation and guardrail logic, the Slack integration, and every email template.

### Compliance Agent Ecosystem — *multi-agent system for security & vendor-risk diligence*

Architected and operate a multi-agent system automating enterprise security and vendor-risk questionnaire responses: an autofill agent drafting against a governed 320-row answer bank, an evidence-conversion agent turning SOC and penetration-test PDFs into queryable knowledge pages, a knowledge-base health monitor, and an append-only control agent that refuses to close a run with unresolved approval gates. Runs on scheduled crons behind human review gates — a 152-item enterprise questionnaire now comes back as a reviewed draft.

## EXPERIENCE

### Director of Finance · april

12/2024 – Present · New York, NY

- **0-to-1 ownership.** Joined as april's first finance hire and built the entire function from scratch; sole senior finance leader owning FP&A, Accounting, Revenue Operations, and Compliance.
- **Systems over headcount.** Cut month-end close from 31 days to 7 in four months while running a Series B, then to 5 days by year-end 2025 — by rebuilding the process and the stack, not by hiring.
- **Cross-functional under pressure.** Ran the SOC 1 audit independently and led april through back-to-back clean KPMG audits; supported the SOC 2 Type II program and drive security, engineering, legal, and GTM to close enterprise diligence for regulated financial-institution customers.
- **Board-facing.** Built the first bottoms-up revenue model (ARR, CARR, bookings) and the forecasting behind april's \$40M Series B; delivered board packages and investor updates independently.

### VP of Finance & Operations · Kisi

02/2024 – 12/2024 · New York, NY

- Led strategic direction across FP&A, Accounting, People, Legal, Operations, and Revenue Operations; drove a 25% valuation increase and 6–8 months of added runway, and launched GTM and pricing changes worth 10% of net profit margin.

### Director of Finance · Prime Trust

01/2022 – 02/2024 · New York, NY

- Built the company's first FP&A team and its revenue, operating, and GTM models; implemented Planful and built the first Executive and Board dashboards in Looker; built a predictive churn model with Sales leadership using machine learning; supported the \$150M Series B and raised \$50M in growth capital.

## EARLIER EXPERIENCE

**Principal Financial Analyst, Prosper (2021 – 2022).** Consolidated planning across P&L and cash flow, and the unit-economics analysis behind Prosper's credit card launch.

**FP&A Manager, iTradeNetwork (2019 – 2021).** Built the first functional-cost model and implemented Planful, cutting close time 50%.

**Senior Finance Analyst, MightyHive (2018 – 2019).** Ran global billing through \$100M-to-\$1B hypergrowth; finance partner on the \$150M public merger with S4 Capital.

**Controller, Harvard Eye Associates (2016 – 2018).** Led due diligence for a \$78M PE acquisition; lowered AR days 72%, moving cash flow from negative \$1.2M to positive \$650K.
