HOW I WORK

AI-native building
0-to-1 ownership
High agency, low supervision
Cross-functional leadership
Systems & control design
Executive communication

AI & AUTOMATION

Agents Claude & Claude Code, MCP connectors, multi-agent orchestration, scheduled runs, eval and run logs

Build Python, SQL, Notion API, Slack bots, workflow automation, RAG-style knowledge bases

Applied AR collections, security questionnaire autofill, evidence pipelines, docs sync

FINANCE & DATA STACK

Planning Drivetrain, Planful, Anaplan, Pigment, Runway

Systems Campfire, NetSuite, Numeric, Ramp, Chargebee, Stripe

Compliance & BI Drata, Thoropass, Anrok, Looker, Tableau

CRM Salesforce, HubSpot

EDUCATION

B.S. Business Strategy & Public Health

Brigham Young University, 2014

LANGUAGES

English (native) · Spanish (native)
Portuguese (intermediate) · ASL (proficient)

PROFILE

AI-native operator who builds the systems, not just the plans. I joined april as its first finance hire, built the function from zero, and now run it as sole senior leader — then built a library of production AI agents on top of it that run AR collections and enterprise security diligence end to end. I work where product, engineering, GTM, and finance overlap: I find the problem, scope it, ship the system, and own the outcome without waiting for a spec. A decade of finance and fintech operating depth is what tells me which problems are worth automating.

AI SYSTEMS I'VE BUILT

Invoice Butler — *AI-driven AR collections engine*

Designed and deployed a ten-stage collections system that moves overdue accounts without manual chasing: tiered automated email dunning in two customer voices, a Slack-bot gate that posts account dossiers and hands ownership to Customer Success, an automatic Growth escalation ladder applying staged commercial pressure, and a hard auto-escalation backstop. I built the tag-driven workflow architecture, the escalation and guardrail logic, the Slack integration, and every email template.

Compliance Agent Ecosystem — *multi-agent system for security & vendor-risk diligence*

Architected and operate a multi-agent system automating enterprise security and vendor-risk questionnaire responses: an autofill agent drafting against a governed 320-row answer bank, an evidence-conversion agent turning SOC and penetration-test PDFs into queryable knowledge pages, a knowledge-base health monitor, and an append-only control agent that refuses to close a run with unresolved approval gates. Runs on scheduled crons behind human review gates — a 152-item enterprise questionnaire now comes back as a reviewed draft.

EXPERIENCE

Director of Finance · april 12/2024 – Present · New York, NY

- First finance hire at a Series B fintech; built the entire function from zero and run it as sole senior leader across FP&A, Accounting, Revenue Operations, Compliance, and Treasury.
- Compressed month-end close from 31 days to 7 in four months and to 5 by year-end 2025 — by rebuilding the process and the stack, not by hiring — and delivered the first-ever consolidated U.S.–Israel financials, migrating onto Campfire in 48 hours against a 2–6 month industry benchmark.
- Implemented ten core platforms (Campfire, Ramp, Runway, Drivetrain, Anrok, Growfin, Thoropass, Safebase, QuotaPath, Guideline) and moved accounting from outsourced to in-house, hiring the team that replaced a \$144K/yr fractional CFO and \$88.5K/yr outsourced FP&A.
- Ran the SOC 1 audit independently and led april through back-to-back clean KPMG audits; supported the SOC 2 Type II program and drive security, engineering, legal, and GTM to close enterprise diligence for regulated financial-institution customers.
- Built FP&A as an operating system — three-statement model, ARR waterfall, sales-capacity and headcount models, and driver-based scenarios fed by HubSpot, Campfire, and GCP — behind april's \$40M Series B and Series C readiness.

VP of Finance & Operations · Kisi 02/2024 – 12/2024 · New York, NY

- Owned strategic direction across FP&A, Accounting, People, Legal, Operations, and Revenue Operations; drove a 25% valuation increase and 6–8 months of added runway, and launched GTM and pricing changes worth 10% of net profit margin.

Director of Finance · Prime Trust 01/2022 – 02/2024 · New York, NY

- Built the company's first FP&A team and its revenue, operating, and GTM models; implemented Planful and built the first Executive and Board dashboards in Looker; built a predictive churn model with Sales leadership using machine learning; supported the \$150M Series B and raised \$50M in growth capital.

EARLIER EXPERIENCE

Principal Financial Analyst, Prosper (2021 – 2022). Consolidated planning across P&L and cash flow, and the unit-economics analysis behind Prosper's credit card launch.

FP&A Manager, iTradeNetwork (2019 – 2021). Built the first functional-cost model and implemented Planful, cutting close time 50%.

Senior Finance Analyst, MightyHive (2018 – 2019). Ran global billing through \$100M-to-\$1B hypergrowth; finance partner on the \$150M public merger with S4 Capital.

Controller, Harvard Eye Associates (2016 – 2018). Led due diligence for a \$78M PE acquisition; lowered AR days 72%, moving cash flow from negative \$1.2M to positive \$650K.
