People & Equity Justworks, Carta, Rippling, QuotaPath, Guideline

BI & CRM Looker, Tableau, Salesforce, HubSpot

EDUCATION

B.S. Business Strategy & Public Health

Brigham Young University, 2014

SUMMARY

Finance executive who builds finance functions that scale. I run FP&A, Accounting, Revenue Operations, and Compliance at april as its sole senior finance leader, a function I built from zero as the company's first finance hire. Ten-plus years across SaaS and fintech: GAAP accounting and audit-ready governance stood up from scratch, global consolidations delivered, \$250M+ in capital supported, and manual, vendor-dependent operations replaced with automated systems that run leaner than the headcount they displace.

EXPERIENCE

Director of Finance · april

12/2024 – Present · New York, NY

- First finance hire; built the entire function from zero and run it as sole senior leader across FP&A, Accounting, Revenue Operations, Compliance, and Treasury for a Series B fintech running U.S. and Israeli entities.
- Compressed month-end close from 31 days to 7 within four months and to 5 by year-end 2025, and delivered april's first-ever consolidated U.S.–Israel financials, migrating the company onto Campfire in 48 hours against a 2–6 month industry benchmark.
- Moved accounting from outsourced and consultant-dependent to fully in-house: closed the 2024 books, resolved intercompany, deferred revenue, and AP/AR cleanup, ran a 2024 revenue restatement, and authored the technical accounting library (ASC 606, 842, 810, 830, 718), all while offboarding a \$144K/yr fractional CFO and \$88.5K/yr outsourced FP&A, consolidating four tax and audit firms into one, and hiring the Accounting Manager and Staff Accountant who replaced them.
- Led april through its first-ever KPMG audit to a clean opinion and repeated it the following year; ran the SOC 1 audit independently, supported SOC 2 Type II, and stood up risk governance: Risk Committee charter, controls documentation, and the policy library behind enterprise diligence for regulated financial-institution customers.
- Implemented ten core platforms (Campfire, Ramp, Runway, Drivetrain, Anrok, Growfin, Guideline, QuotaPath, Thoropass, and Safebase), rebuilding ASC 606 billing and revenue recognition, AP and procurement controls, automated multi-jurisdiction sales tax, collections, commissions, and trust infrastructure.
- Built FP&A as an operating system: three-statement model, ARR waterfall and snowball, sales-capacity and headcount models, unit economics, and driver-based scenarios fed by HubSpot, Campfire, and GCP; the board's primary forecasting reference and the basis for april's \$40M Series B and Series C readiness.
- Built the people infrastructure behind a scaling finance org: compensation and equity philosophy, career ladders and leveling guides, performance review framework, workforce planning SOP, and commission plans.
- Built a growing library of AI agents on top of the finance stack, including Invoice Butler, an AI-driven AR collections engine, and a Compliance Agent Ecosystem automating security and vendor-risk questionnaires.

VP of Finance & Operations · Kisi

02/2024 – 12/2024 · New York, NY

- Owned strategic direction across FP&A, Accounting, People, Legal, Operations, and Revenue Operations; drove a 25% valuation increase and 6–8 months of added runway within six months through net working capital and pricing optimization.
- Ran a full-scale 2023 restatement and deployed Chargebee for accurate, timely revenue recognition; launched new GTM and pricing strategies that added 10% to net profit margin.

Director of Finance · Prime Trust

01/2022 – 02/2024 · New York, NY

- Hired as FP&A Manager and promoted to Director; built the company's first FP&A team, set the vision for Procurement, FP&A, and Treasury, and built the first revenue, operating, and GTM models plus a predictive churn model with Sales leadership using machine learning.
- Implemented Planful for the first three-statement forecasts and headcount planning and built the first Executive and Board dashboards in Looker; chaired a company-wide restructuring, presented results to the Board, supported the \$150M Series B, and raised an additional \$50M in growth capital.

EARLIER EXPERIENCE

Principal Financial Analyst, Prosper (2021 – 2022). Consolidated planning across P&L and cash flow; built the unit economics behind Prosper's credit card launch.

FP&A Manager, iTradeNetwork (2019 – 2021). Owned revenue and EBITDA forecasting for the C-suite; built the first functional-cost model and implemented Planful, cutting close 50%.

Senior Finance Analyst, MightyHive (2018 – 2019). Ran global billing through \$100M-to-\$1B hypergrowth; finance partner on the \$150M public merger with S4 Capital, overseeing consolidations and treasury on NetSuite under US GAAP.

Controller, Harvard Eye Associates (2016 – 2018). Led due diligence for a \$78M PE acquisition; lowered AR days 72%, moving cash flow from negative \$1.2M to positive \$650K.

Practice Administrator, Retina Consultants of Nevada (2013 – 2016). Ran a six-office, 90+ FTE practice; grew revenue from \$12M to \$15M and reduced denials 35%.
